FRIDAY NOVEMBER 13 1942

NUMBER 29

Vets Banquet And Dance Well Attended

The Vets Banquet and Dance held Wednesday evening were both well attended. There were 32 seated at the tables in the Sugar Bowl, amongst them Dr. G. W. Leech former President of the local Legion. After the luncheon an hour was spent in singing old war songs and recounting experiences the boys had met with in their service.

The Opera House was well filled for the Dance and every one had a most enjoyable time dancing to the music of the Anderson Sisters orchestra. The proceeds are to be used for Xmas Hampers for the boys in the service and judging by the success of the Dance some very nice boxes will be sent away.

Mr. and Mrs. Lee Brewerton returned home Tuesday from their business trip to Winnipeg.

Mrs. Remy Mitchell informs us that Remy is now in England and that he was made a Sergeant just before they went across. Scott Kinniburgh is also in the old country.

A SOLDIERS PRAYER

Dear God! If this has got to be
This world of strife, and grave
iniquity
If we must kill, to save our
native land
From Axis powers, and from
their crushing hand
So let it be! and may we live
and learn
To fight and hate, to scourge
and kill and burn;
God give us strength our lines
may not be broke.
Let us be brave, thru blood and
hell and smoke.
May we not flinch nor ask the
reason why
If we must go, if we have got
to die;
If that's our fate then we must
let it be
For you to say it is our destiny.

But if we may, Dear God,
please let us live,
That we may conquer, win and
then forgive
God grant us this, and be There
with us yet
Lest we forget
That they, like us were fighting
for their land
They gave their all, to Hitler's
cruel command,
They had no right to die
Hitler's say so
Or face the guns, of his own
cruel Gestapo.
God grant us mercy, and make
us understand
When this is over, to stay the
killer's hand.
Grant us then peace Dear Lord
And may we all return
To those we love, to where
To those we love, to where
the home fires burn
But for the present Lord
please grant us strength
That we may withstand all for
any length
Of time, and if it be Thy will
Let not our morals fall, be
with us still.
Let us all live, that we may
feel no shame
When we are back with those
we love again,
And so again Dear Lord, I ask
it yet
Be with us for all times,
Lest We Forget.

—Staff-Sergt. L. R. Lybbert.

CBC BIBLE DRAMAS

During the winter months the CBC will present a series of Bible dramas every Sunday morning at 9:30 a.m. MDT. These plays will be interesting to young and old and have been prepared by Earle Grey, CBC Script writer and Canon J. E. Ward, Chairman of the National Religious Advisory Council.

Here are the dates and the subjects for November:

November 1st—"Noah, a Savior in his time."

November 9th—"Abraham, man of faith."

November 15th—"Moses, leader of his people."

November 22nd—"David, the shepherd king of Israel."

November 29th—"Elijah, prophet of the true religion."

Municipal Council Meeting

The Municipal Council met in regular session Tuesday afternoon at the office with all councilmen present. Routine business and the passing of the payroll occupied the time, and a few matters were discussed but no definite decision reached on any of them.

NEWS NOTES

A good crowd, good prices and everything sold, was how Jack Newby, Auctioneer described the sale at Bob Graham's farm on Monday of this week.

Jack Kotkas got a skunk Tuesday afternoon, but not before the skunk got Jack. Jack had a wide berth all afternoon around the Factory and really seemed to enjoy it.

If you don't think gas rationing and the tire situation has made a difference you should see the extra busses that come in nearly every week-end. Last Friday evening there were three busses at the local bus depot.

Raymond's Big Carnival is coming up November 25 and 26. Draw a ring around these dates on your calendar and plan to be there and join in the fun. Big prizes, clean fun and good dancing.

M. Men and Gleamers of the 2nd Ward held their Fireside meeting at the home of Mrs. Emma Dahl Sunday evening. A good crowd was present and the young people greatly enjoyed the singing and "cats."

Quarterly Conference Next Week

Quarterly Conference of the Taylor Stake of Zion will be held Saturday and Sunday, November 21st and 22nd in the Stake House. No information has been received from Salt Lake City as to who the visitors will be, but someone is expected to be present. The Mutual Chorus is busy rehearsing for a special program on the Sunday evening and we will have more details next week.

25 p.c. Over The Top

Raymond's Victory Loan is over the top by 25% and by the time this is printed the extra pennant will be flying from the pole. Congratulations are due the committee members and the loyal citizens of the district who have dug down and made this fine contribution to Canada's war effort.

When a district the size of Raymond subscribes \$90,000 to a loan we think it very praiseworthy and deserving of commendation. It is not the big subscribers in the \$5 and \$10 thousand dollar class that put these loans over, it is the \$500, \$100 and \$50 subscribers, who really make an effort to buy a bond that put the totals up and we say, on behalf of the Committee to these people "Thanks a million" for helping us put the loan over.

When Peace Comes

While we glory in the victories of the Allies, and rejoice with Canada in the splendid response to the Victory Loan just we can, let us maintain a spirit closed, and stand with every move for Victory, one hates to think of the price and sacrifice in human life and wealth to carry on the war and bloodshed and destruction, and one naturally asks himself "what of the world of tomorrow when peace comes? From appearances just now it begins to look, as if the Axis sun were commencing to set, and the night of the Allies beginning to be felt on all our battlefronts. This is what we have been hoping to see ever since the war started, and we are glad to see it. We hope that we shall not be called disloyal nor disinterested when we venture the statement that the big job ahead for democracies and for governments in free lands will be the shaping of a program that will abet a permanent and lasting peace, and a peace based on equity and justice for all, with our social barriers removed, our plane of living standardized, and a spirit of understanding and goodwill in the hearts of men that will do away with covetousness and selfishness.

There is no question but what this is a big order. Is our spirit of war & destruction getting into our souls to embitter us against all who oppose? Will our participation directly and indirectly in the struggle make us and our children hate those whom we have been forced to oppose? Are we losing the spirit of Christianity and adopting instead a spirit of conquest and might is right? If we are, then we should change our attitude right now. We placate ourselves and say "well, we don't want to fight but the Germans have forced us into it." Doesn't it occur to you that most of those with whom we are fighting have been forced to fight by the same powers that put us into the fight. True, there is a right and a wrong to the question and we are sure we are on the right side, but this fact still does not give us reason to hate with all the strength of hate we have the innocent victims of a maddened leader. The poem "A Soldier's Prayer" written by Staff-Sergt. Lyle Lybbert, whom most of us know and which is printed in this paper, portrays better than we can the spirit that should characterize our efforts in the present conflict. If the job must be done then let us to the work, but let us do it without hate and bitterness. Let us do it without glorying in the killing and destruction that apparently has to be wrought. If we can, let us maintain a spirit of charity and patience even toward those with whom we fight and keep the rancor of hate and bitterness out of our souls. Why?

Well, from amongst the men who are fighting today and who will return, will come the leaders of the democracies of the world who will have to shape the new order. We know we will be challenged when we say a new order is bound to come, but it appears self-evident that the lessons of the present show in no unmistakable terms that a higher standard of living for the laboring class is possible, it also shows that it can be had without undue sacrifice on the part of anyone, or without increased burdens for the laboring class. Are our financial men going to be foolish enough to think that after all the men in the service have gone through to maintain freedom for us at home that they will revert to the rank of \$2 a day men while a few grow fat on the profits of their labors? Will our government again loosen up the holds they have now obtained on controlling things to maintain an equilibrium in prices and commodities, goods and services and so on. We are not advocating state control in every thing, but we think the state should maintain a watching brief over our affairs and should see that a fair and equitable level of wages, living standards, hours and so on are maintained and that no few are put in a position where they have a monopoly on goods, services and wages as has been the case in certain times in bygone years.

We are enjoying a period of prosperity but it does not leave a very good after taste when we think that we had to have a war to get it. If one believes the Bible, and we all do, then we cannot get away from the teachings of the Master that the measure of success is the Golden Rule, "therefore, as ye would that other men should do unto you, do ye even so to them." That is the final word. We can dodge the real issue. We can say that such doctrine is only a Bible propaganda and not workable. It still stands and is still true. Man is today, and always has been happiest when he was rendering service to others and not doing it with a question in the back of his mind "how much will I get out

Largest Beet Pay In History Of Beet Growers

Y. T. SHORTS

Well folks, here's your chance to find out what the folks do up at the Youth Training classes. Next Monday at 8 p.m. they are holding an "Open House" evening. Anyone over 16 yrs. of age who does not attend school may attend. The group will go through a regular evening's workout that will include exercises tumbling, balancing, folk dancing and games. Each activity period will be shortened so there will be time for social dancing and lunch.

Ruth Gibb is in charge of the lunch and she and her committee are asking each girl to bring a loaf of bread made up into sandwiches, and a half cup of sugar; the boys are to bring the girls and a dime to help pay for the drinks. (Doesn't that sound like a good party?) All you people who have been wondering what has been going on up at the High School Gym. on Monday and Thursday evenings better break loose from the old routine and come see how to keep young and enjoy yourself.

Boys class on Monday saw Milo Vance back to his old shooting form, seemed like he couldn't miss that basket; but in spite of this Bill Hansen and W. S. were still too fast and beat the other three in a game of twenty-one.

The Welling center got under way in spite of the fact that nobody knew anything about the class. The first class was held with four attending. Age spread was 16 to 57 years, and the 57 year trainee turned out to be quite an athlete. Muscles may be a little rusty but they soon responded to Youth Training activities. The girls proved they could keep the hockey puck out of the goal when the boys were shooting.

We'd like to know—
Why that darned piano is so heavy.
Why there is never enough boys for the folk dancing.
Why Katherine's serve is so difficult to return.
Why we can't use the Opera House for classes.
If there are enough ladies interested in attending a "Keep Fit" class from 4:30 to 5:30 p.m. two days a week.
Why that backward roll looks so easy when someone else is doing it.

Miss Nova O'Brien from the S.P.T.B. at Clarksburg was home over the week-end accompanied by one of her chums also in the service.

of it."

This is the job of governments of the future. This is the job of the churches of today and tomorrow. It is the job of schools and colleges to teach men and women and boys and girls that the big thing in life and the big job of all is to build a true democracy where justice and truth will prevail and where the good and welfare of all will be the business of everyone. Are we big enough for the job, or must we hope that a future generation with broader vision and more moral courage will tackle and solve the problem that we saw before us but were too small and weak to handle?

The biggest pay day in the history of Southern Alberta beet growers was last week-end when more than a million and three-quarters dollars went in to the mails, representing a payment of \$6.75 per ton on all beets dug and delivered up to October 20th.

The initial payment represents an increase of a dollar and a half a ton over what has been the payment back a few years when growers received \$5.25, and it also is made on a much larger tonnage than is usually in on cut-off date, hence the large amount. This payment is minus deductions for seed, fertilizer, advances of one kind and another, so that while the total figures made this large amount, there was not actually that much put in the mails for the growers.

These cheques were cashed Monday and circulated to beet workers, machinery bills, store accounts etc., so that many benefited from the payment as it always the case when pay day comes from such crop and bills are paid.

School Board In Regular Meeting

The Raymond School Board was in regular session Monday evening last. Routine business and the passing of the payroll were the main items of the meeting.

The extra accommodations necessary for the Japanese children have been completed and after readjustments had been made in a number of the rooms, things are now going along smoothly.

NEWS NOTES

Lieut. Smellie Redd is home on leave for a few days and is looking well.

Mr. and Mrs. Evans Sabey have moved into the A. D. Terry home in the north end of town and Mr. and Mrs. Bill Preston have moved into the home formerly occupied by them.

An auction sale is being held next Wednesday at the J. H. Walker farm east of the Sugar Factory when J. Cudrak is selling livestock, machinery and smaller articles. See the bills for details.

There's always something. Along with the pay for beets and grain comes taxes, water rentals, oil bills, winter clothes and what not. We just get caught up, and start in again working to pay next year's accounts. Oh well, such is life.

The School Band is starting again and it would be greatly appreciated if people who have band instruments or music in their homes not being used would see to it that they are sent to the High School at once, they are badly needed.

WANTED—One hundred people to bring their surplus milk to the Cheese Factory. If you have a gallon or two a day in excess of your needs, bring it in. You'll be surprised how it mounts up in a few days.

A PARABLE

and an engineer—appeared before St. Peter as he stood guarding the nearby gates.

The lawyer stepped forward—with confidence and assurance he proceeded to deliver an eloquent address which left St. Peter dumbfounded. Before the venerable Saint could recover the lawyer quickly handed a writ of mandamus, pushed him aside and strode through the open portals.

Next came the doctor. With impressive, dignified bearing, he introduced himself: "I am Dr. Brown." St. Peter received you, Dr. Brown. Many who preceded you, said you sent them here cordially. "I feel I know come to our city."

The engineer, modest and diffident, had been standing in the background. He now stepped forward. "I'm looking for a job," he said. St. Peter wearily shook his head. "I am sorry," he replied. "We have no work here for you. If you want a job, you can go to hell." This response seemed familiar to the engineer and made him feel more at home. "Very well," he said. "I have had hell all my life and I guess I can stand it better than the others." St. Peter was puzzled. "Look here, young man, what are you?" "I am an engineer," was the reply. "Oh, yes," said

St. Peter. "Do you belong to the Locomotive Brotherhood?" "No, I am sorry," the engineer responded apologetically. "I am a different kind of engineer." "I do not understand," said St. Peter. "What on earth do you do?" The engineer recalled a definition and calmly replied: "I apply mathematical principles to the control of natural forces." This sounded meaningless to St. Peter and his temper got the best of him. "Young man," he said, "you can go to hell with your mathematical principles and try your hand on some of the natural forces there!"

And it came to pass that strange reports began to reach St. Peter. The celestial denizens who had amused themselves in the past by looking down upon the less fortunate creatures in the Inferno, commenced asking for transfers to that other domain. The sounds of agony and suffering were stilled. Many new arrivals, after seeing both places, selected the nether regions for their permanent abode. Puzzled, St. Peter sent messengers to visit hell and to report back to him. They returned, all excited, and reported to St. Peter:

"That engineer you sent down there," said the messengers, "has completely transformed the place so that you would not know it now. He has harnessed the fiery furnaces for light and power. He has cooled the entire place with artificial refrigeration. He has drained the lakes of brimstone and has filled the air with cool perfumed breezes. He has flung bridges across the bottomless abyss and has bored tunnels through obsidian cliffs. He has created paved streets, gardens, parks and playgrounds, lakes, rivers and beautiful waterfalls. That engineer has gone though hell and has made of it a realm of happiness, peace and industry."

Department of Labour National War Labour Board GENERAL ORDER

The Dominion Bureau of Statistics has found that the cost of living index number for October 1, 1942, is 117.8 (adjusted index 116.9) as compared with the cost of living index number for July 2, 1942, of 117.9 (adjusted index 117).

The Wartime Wages Control Order, P. C. 5963, provides in Section 48 (iv):

"the amount of the bonus shall not be changed unless the cost of living index number has changed one whole point or more since the last general order of the Board requiring an increase or decrease in the amount thereof."

The index number not having changed by one whole point or more since July 2, 1942, pursuant to the provisions of P. C. 5963 as stated, the National War Labour Board orders that the terms of its General Order dated August 4, 1942, shall continue to apply for the period November 15, 1942, to February 15, 1943, subject to the right of employers or employees to apply to a War Labour Board for authorization of payment of such an amount of cost of living bonus as a Board may determine to be "fair and reasonable," under the provisions of the Order.

TWO YOUNG MEN

with faith in themselves

BEFORE the war, two young graduates in chemistry faced the future with no assets but technical training and unbounded faith in themselves. They planned to capitalize on their years in college by manufacturing a certain chemical product. "But we'll need some money to get started," they said. "Let's put it up to the bank."

Their banker decided that their faith was well founded in character, ability, energy. "We'll finance you to start in a small way," he said. "Make a test on the local market first."

Presently the product was being sold all over Canada and exported to the United States and overseas. Now it fills a wartime demand. The enterprise employs a large number of people.

This actual example illustrates how this country's Chartered Banks help credit-worthy people to benefit themselves, their fellows and their country under the democratic system of free enterprise.

Banks, like any other business, exist because they provide service which a community needs and is willing to pay for at a rate which will yield a reasonable profit. Chartered Bank profits average less than one-half of one per cent a year on total assets. Few, if any, other businesses operate on as small a margin.

THE POWER BUCK RAKE

The combine harvester along with power driven grain loaders has taken much of the exercise called hard work out of grain harvesting. This is the method employed over a very wide area in Southern Alberta and seems to be creeping farther north every year. However there is still a large acreage of cereal grains that are bound and stooked due to variable circumstances.

The labour problem for this method of harvesting is becoming more serious every season. A mechanical stooker was designed near Edmonton a number of years ago, but it has failed to get beyond the experimental stage. Now labour-saving methods that bring sheaves of the thresher are being experimented with by farmers in a number of districts in Alberta as well as other parts of Canada and the United States.

The Power Buck rake is one of the most promising implements used for this purpose. It consists of a 10-foot x 12-foot sweep rake attached to the rear end of an old truck or on the front end of a tractor. Experiences reported by a number of farmers say that such a machine, on a short haul, will keep a 28-inch separator going. This represents a considerable saving of man power, and in turn reduces the cost of production.

The initial cost of such a machine is not great as the sweep can be built in the farm

shop and attached to an old truck that has served its time on heavy road work. Tires need not represent a problem any reasonably good second-hand tires will do.

The University of Ohio has given this venture considerable trial and study. We might summarize their requirements for a good Buck rake:

1. Capacity of 700 to 1000 pounds per load, especially important if the length of haul exceeds one-eighth of a mile one way.

2. Speed of at least 8 miles per hour, also especially important on the longer hauls.

3. Width which gives adequate clearance for ordinary gates and lines. A 10-foot width with 12-foot teeth is a combination very popular with Ohio farmers.

4. A lift of four feet or more at the end of the teeth. This prevents the sheaves from dragging and shattering and also from shaking off while being hauled.

5. A power lift, since a lot of "elbow grease" is required to lift a 1000-pound load to the required height.

The Dominion Experimental Station at Lethbridge would be pleased to supply further information about Power Buck rakes. It is too late to do anything about this year's crop, but it is possible that labour will be equally scarce another year and some effort should be made to meet the situation.

WEST'S SCRAP SPURS WAR WORK, SAYS EASTERN STEEL PLANT HEAD

Harold P. Coplan, of Hull Steel Foundries, writes Government Salvage Agency Lauding Prairies' Response to Drive — Says Metals Blocked Shortage. Insure Steady Flow of "the Tools"

Hull, Que., Oct. 6—Western scrap metals, recently collected, will prevent many an Eastern war plant from being throttled in production, says Harold P. Coplan, president of Hull Steel Foundries, Ltd., who has written Wartime Salvage, Ltd., of Ottawa, that the West merits the thanks of all Canada for its invaluable contribution to beating the Axis. Mr. Coplan's letter says:

"Thousands of tons of steel scrap which you have allotted to Hull Steel Foundries, Ltd., now have reached our plant and insure full-time operation of our foundry during the entire winter season."

"I understand this scrap was collected in a drive which your corporation staged recently throughout the Prairie Pro-

vinces. I feel I cannot allow the occasion to pass without extending to our fellow-Canadians of the West the sincere congratulations of Hull Steel Foundries, Ltd., upon the magnificent response they have made to your appeal for material so essential to maintaining the flow of 'tools' to our boys and our allies."

"Beyond question, a number of war plants might well have been throttled in their production for want of raw material, if not for the timely help that came out of the West. In the case of Hull Steel Foundries, we can now guarantee for months ahead a steady supply of steel castings vital to Canada's war production."

"As one executive engaged on priority contracts, I think it only just that the people of the Prairies should be informed of the true value of the scrap they have turned over; equally, I hope all Canadians will be made appropriately aware of

the invaluable contribution the west thus has made to our country's war effort."

Bishop J. O. Hicken was speaker at the Laymon 2nd Ward Sacrament meeting Sunday evening when he reported on the recent Salt Lake Conference. He reported a number of faith promoting and inspiring testimonies that were related there and made a very interesting meeting. The Choir rendered a special musical number.

At Rotary on Monday T. Geo. Wood was the speaker, reporting on the recent trip to Idaho made with Frank Taylor, the purpose of which was reported last week. The Idaho Falls section of the state is very busy and crops here this year have been good. On their trip they drove on to Blackfoot where they visited one evening with Mr. and Mrs. H. F. Hodge, former Raymond residents who asked to be remembered to their many Raymond friends.

A Veteran at 20!

Back from scores of bombing raids over a dozen countries, this young airman has found adventure in the skies! Just out of his teens, an eager youth in years, he's a veteran in experience. He's a first-line fighting man, trained in the science of war at 5-miles-a-minute!

He and his buddies in R.C.A.F. air crew are team-mates. Gunner, Wireless Operator, Bomber, Pilot, Navigator—all work together as a smooth, swift "attack team" in a giant bomber. Their targets accurately surveyed in advance by daring reconnaissance pilots—their flight protected by the blazing guns of fighter planes—the bombers wing their relentless way to smash Nazi nerve-centres.

The expanded Air Training Plan has room for more men who want to be with these fighting comrades of the skies. Right now applications are being accepted for air crew duty, at R.C.A.F. Recruiting Centres throughout Canada.

If you are physically fit, mentally alert, over 17½ and not yet 33, you are eligible. If you are over 33, but have exceptional qualifications, you may still be considered. Lack of formal education is no longer a bar to enlistment.

TOP PRICES FOR YOUR HOGS—I buy hogs every Thursday at the Raymond Stock yards, highest prices.—Ern. H. Nilsson, Raymond.

Mr. and Mrs. A. D. Terry are now living in Calgary where Austin has employment.

Mose Lightfoot, one of the best hog carriers on the job, lost his footing and fell to the street, four stories below.

Mose hit on his head, struck the cement pavement and went through to the basement.

When the foreman went to the basement, expecting to find Mose cold and stiff, he met Mose coming up the steps.

"Great Scott, man, aren't you killed?" he cried.

"No," Mose replied, dusting off his clothes. "I guess dat concrete pavement musta broke my fall."

SHORTAGE OF BACON

By H. G. L. Strange

Canada has been unable to supply Britain with the 600 million pounds of bacon she promised, and Mr. J. Gordon Taggart, Price Boards Food Administrator, stated at Ottawa on Nov. 3rd that the people in Canada would probably have to be rationed for bacon and so for all meat products.

It is evident the Government is hesitating about rationing Canadian people. They should not hesitate for a moment if it will help the war effort of the United Nations. A soldier can only fight as well as he is fed. Our fighting forces, and the civilian workers being bombed in the Battle lines in Britain and elsewhere must have meat and plenty of it. It would not hurt us in Canada if we went without bacon and it would not hurt if all meats were rationed.

To administer rationing, however, costs a lot of money and there is a better way I suggest. Raise the price of hogs for farmers, and then they will and it necessary of cattle to produce more.

Hogs multiply quickly and we have ample feedstuffs including wheat to raise them. The extra price to the farmers would cost less, I believe, than the cost of administering rationing.

Following factors have tended to decrease supply and increase demand:— Argentine wheat crop is estimated at 181 million bushels as compared with 224 million a year ago. Unfavorable weather conditions in Rumania tend to decrease the amount of wheat seeded this year.—The shortage of bread and feed grain in Europe is becoming steadily worse.

Following factors have tended to increase supply and decrease demand:— Official estimates placed the Argentine wheat surplus at 177,680,000 bushels.— Fall wheat acreage in the U. K. has been further increased.— The Australian wheat crop is estimated between 131 and 141 million bushels, well in excess of domestic and export needs.

"Iron Horse" Groomed by Women Wipers

THEIR bosses say they do better work than the young apprentices formerly assigned to the job, and the girl engine wipers, and car cleaners answer with "Why not". So that angle of the man power shortage is being well looked after on the Canadian Pacific Railway Company's yards as evidenced by this picture taken on Vancouver Island.

Women car cleaners, yard cleaners, shop laborers, and mechanics are employed at several other points on the eastern and western lines of the Canadian Pacific Railway. Certainly many of the men have been called up in the active service and the women have taken their place. In the yard there, with the help of men H. Hanbury, safety engineer, and the engine cab, and L. S. C. Hanbury, crane engineer, are four women engine

women. Mrs. G. S. Hanbury, Mrs. A. V. Hanbury, Mrs. A. J. Hanbury, and Mrs. A. J. Hanbury. They are all employed at the same point on the Canadian Pacific Railway. They are all employed at the same point on the Canadian Pacific Railway. They are all employed at the same point on the Canadian Pacific Railway.
